Click to confirm that in last 14 days you have NOT had a fever or a new cough or a loss of taste or smell

NO Fever or Cough or Loss of taste/smell

Click to confirm in the last 2 days no COMBINATION of SYMPTOMS which could indicate Covid-19 virus

NO other symptoms such as ongoing fatigue, shortage of breath, headache, muscle ache, vomiting etc

Click to confirm that in last 14 days you have NOT tested positive or had close contact with anyone known or suspected of having Covid-19

NO contact with anyone who has/could have Covid-19

Click to confirm that in last 14 days you have NOT been out of the UK in a country subject to self-isolation upon return, or on a cruise

## The data is used by:

### 1 MAIN USE: Test and Trace, if they ask for it

This is the main use intended for the system. T & T will act after a person tests positive: contamination in another environment such as a factory or a crowded event is far more likely but running clubs are still possible.

If the person tested is a RH member they may be asked on what dates they turned out and who else was involved. The tracers will then assess other RH persons who were also involved on that/those dates

It is easier with the WebApp as our activities show lists of persons **involved over a three-week period, after which it will be erased.**

For this purpose, it is important to 'click' on the **day of your activity, morning or at the activity start.**

**#NOTE# NOT the day before.**

### DATA FILE CREATED and AVAILABLE TO T&T:

Your name, contact email, contact mobile number, dates on which you logged in, usual group. That's all.

### 2 Coaches or run leaders or event organisers

As a precaution, together with observation and any other indications, to try to ensure only 'well' people are taking part.

For this purpose, a later 'click' might be preferable

### DATA AVAILABLE TO COACHES ETC:

Your name, whether you logged in 'today' or 'yesterday' and your usual group. Nothing else.

### 3 Yourselfes

To notify RH club of any missing data or changes in contact details.

The update in members database will be carried out at periodic intervals, the app does not access the members database.

### 4 Various possibilities eg (possibilities)

Registration of group members in Young Athletes

Assessing group numbers in advance
